

Studi Kualitatif Perilaku Perineal Hygiene Narapidana Wanita di Lembaga Pemasyarakatan Kelas II a Bogor Tahun 2015

Puspawati, Nuradia

Deskripsi Lengkap: <https://lib.fkm.ui.ac.id/detail.jsp?id=118427&lokasi=lokal>

Abstrak

The condition of prison which does not fulfill the reproduction health right of women prisoners and the high risk of communicable disease have been the background of the research. The aim is to find out the deep information about perineal hygiene behavior of women prisoners at Prison Class II A Bogor in 2015. Primary and secondary data have been taken since March until June 2015. Data collection method was using In-Depth Interview to four women prisoners and four key informants. As a result, perineal hygiene behavior of women prisoners are influenced by knowledge, attitude, availability of prison facility, accessibility to information, peers and official support. The behavior is also influenced by belief of some informants. Prison facility are not fulfilling the right of prisoners.<div> </div><hr /><div> </div>Kondisi Lapas yang pada umumnya tidak memenuhi hak kesehatan reproduksi narapidana wanita serta tingginya risiko penularan penyakit melatarbelakangi penelitian kualitatif ini. Penelitian bertujuan mengetahui informasi mendalam mengenai gambaran perilaku perineal hygiene narapidana wanita di Lapas Klas II A Bogor tahun 2015. Data primer dan sekunder diambil sejak bulan Maret hingga Juni 2015. Pengambilan data primer menggunakan metode wawancara mendalam kepada empat orang narapidana wanita dan empat orang informan kunci. Perilaku perineal hygiene narapida wanita dipengaruhi oleh pengetahuan, sikap, sebagian oleh kepercayaan, ketersediaan sarana, keterpaparan informasi, dukungan teman sebaya, serta peran petugas. Keterbatasan sarana di Lapas masih belum memenuhi hak narapidana.
