

Analisis Implementasi Bantuan Operasional Kesehatan (BOK) dengan Cakupan Penanganan Komplikasi Kebidanan di Puskesmas Kota Bekasi Tahun 2019

Naftalin, Farida

Deskripsi Lengkap: <https://lib.fkm.ui.ac.id/detail.jsp?id=134291&lokasi=lokal>

Abstrak

Tujuan dari penelitian ini adalah untuk mengetahui (1) implementasi program bantuan operasional kesehatan (BOK) di Puskesmas Kota Bekasi, (2) ukuran dan tujuan kebijakan, (3) pelaksanaan program cakupan penanganan komplikasi kebidanan, (4) ketersediaan SDM, (5) disposisi pelaksana dan (6) lingkungan sosial, ekonomi dan politik yang mempengaruhi implementasi bantuan operasional kesehatan (BOK) dengan cakupan penanganan komplikasi kebidanan di puskesmas kota bekasi tahun 2019. Variabel penelitian meliputi sumber daya manusia, anggaran, pedoman, fasilitas, perencanaan, pelaksanaan, monitoring dan evaluasi. Sampel yang terlibat dalam pelaksanaan program bantuan operasional kesehatan di Puskesmas Kota Bekasi terdiri dari 9 responden. Hasil penelitian mengungkapkan bahwa perencanaan anggaran sudah sesuai dengan juknis, kebijakan sumber daya manusia belum memadai, jumlah dana sudah mencukupi dan proses akuntabilitasnya memerlukan pengawasan dan penyederhanaan pelaporan. Pada tingkat capaian program penanganan komplikasi kebidanan, cakupan layanan ada yang telah meningkat, tetapi ada beberapa layanan yang tidak memenuhi target Standar Pelayanan Minimal (SPM).

The aims of the research are to find out (1) the implementation of health operational assistance (BOK) at Bekasi City Health Center, (2) the size and objectives of the policy, (3) implementation of coverage programs for obstetric complications management, (4) the availability of human resources, (5) implementation disposition and (6) social, economic and political environment that affect the implementation of health operational assistance (BOK) with coverage of obstetric complications management in the Bekasi City Health Center in 2019. Research variables include human resources, budget, guidelines, facilities, planning, implementation, monitoring and evaluation. The sample involved in implementation of health operational assistance (BOK) with coverage of obstetric complications management in the Bekasi City Health Center consisted of 9 respondents. The results of the research revealed that budget planning was in accordance with technical guidelines, human resource policies were inadequate, the amount of funds was sufficient and the accountability process needed
supervision and simplification of reporting. At the level of achievement of the obstetric complications management program, service coverage has increased, but there are some services that do not meet the Minimum Service Standards (MSS) targets.
