ABSTRAK

Penelitian ini merupakan penelitian kuantitatif dengan rancangan cross sectional. Lokasi penelitian di Kabupaten Karawang dengan populasi penelitian remaja pada 21 SMU Negeri. Penetapan sampel dengan rancangan multistage random sampling dengan besar sampel 300 orang. Tujuan penelitian adalah mengetahui gambaran perilaku seksual remaja SMU Negeri di Kabupaten Karawang tahun 2013 dan hubungannya dengan pola asuh orang tua. Hasil penelitian menunjukkan 32,7% remaja berperilaku seksual berisiko, bahkan 12% sudah pernah melakukan hubungan seksual. Pada analisis bivariat diperoleh hubungan antara pola asuh permisif/otoritatif terhadap perilaku seksual dengan OR 2,462. Variabel yang paling dominan yang berhubungan dengan perilaku seksual remaja adalah paparan jenis media pornografi.

ABSTRACT

The study was conducted by using quantitative method and data analysis was based on crosssectional, data collected from multistage random sampling of 300 high school students in 21 Senior High schools in Karawang Regency. The objectives of the study were to find out the general description of sexual behaviours among high school students in Karawang Regency in 2013, and to investigate the relationship between parenting styles and adolescents' sexual behaviours. The results showed that 32.7% of adolescents have risky sexual behaviours, and 12 % was found had premarital relationship. The bivariate analysis indicated that there was relationship between permissive/authoritarian parenting styles on adolescents' sexual behaviours with OR 2.462. Furthermore, the results also revealed that the explosion of information on pornography from media was contributed as a main variable on adolescents' sexual behaviours.
